

Born to Belong Series Introduction

Born to Belong is a series devoted to community: good, healthy, Christian community that promotes inclusion and generates collaborative ministry among all of God's children. Born to Belong gives a significant look at what it means to be a part of a functioning community, what it means to understand the characteristics of such a community, and how to participate in and improve community.

Lesson 1, Community is Belonging, will help students to look past themselves in the "Me vs. Us" struggle of life. They will explore the Acts model of community and how it is significantly applicable to their group today.

Lesson 2, Community is Understanding, will aid your students in finding their specific role in community. We'll take a glance at how insignificant we are to the greater, global picture, yet how significant we can be if we take our role seriously in building a local and global community mindset.

Lesson 3, Community is Participating, is a "What Now?" lesson that guides youth to identify their gifts and begin to use them. Here they will take a glance at the spiritual gifts teaching of 1 Corinthians and look for its application in their own group.

Belong, Understand, Participate...community is yours for the taking!!!
